

## REDiSAFE GUARDIAN PLUS SERIES

### Seamless Mail Backup On The Fly

In today's environment, email backup is nearly as or more important than backing up documents, yet it's often not as easy. And if you have more than one account, email backup can quickly get out of hand, particularly if you need to find or restore some particular email. With Guardian PLUS, you can have a total solution that allows you to have an ease of mind when it comes to data security.

REDiSAFE gives organisations to be given the assurance that their emails are well protected and easily recoverable as well when necessary.

By capitalising on the capabilities of REDiSAFE GUARDIAN, companies can gain an alternative to the tape-only backup solutions for managing data – an alternative that allows raising operational recovery management to a higher level.

#### How REDiSAFE Guardian Plus Backup works

REDiSAFE Mail Backup is equipped with the ability to minimise any possible email loss encountered by users. REDiSAFE Guardian Plus Backs up emails instantaneously onto the user's local hard disk when new emails are detected. Synchronisation between the user's local hard disk and the REDiSAFE Guardian Plus server will take place every 15 minutes by default

### Benefits

#### Complete Email Backup

This is the easiest way to take backup copies of your Email. You can create a backup job to safeguard your complete data from the PST file. You can also select other files on your computer, from the My Document folder or among other data, to add to the backup job. This ensures the complete safety of your Email data and the other files that you choose.

#### Simple Search Engine

Enables you to search for any message correspondence, subject, sender name and Internet header information data. All this data is completely indexed and you can retrieve any email using this data.

#### Secure and Private

Enables you to backup your entire Outlook Email data. Besides allowing you to backup your data, it also allows you to ensure that your data is encrypted. Emails are always safe and secure.

#### Never Lose Emails Again

Emails can get lost due to corrupt PST files, incomplete backups, and carelessness or even through security gaps at your mail provider. With REDiSAFE GUARDIAN PLUS you can effortlessly backup and restore your email quickly and efficiently.

### Features

#### SIMPLIFIED DATA PROTECTION

- Ease of Deployment
- Backup Scheduling
- Incremental Backup
- Automatic & Seamless
- User Initiated Recovery
- Administration Anytime, Anywhere
- Rich Client Features
- Rapid Disaster Recovery
- Familiarity of User Interface
- Simple Search with Fast Retrieval
- Easy Email Backup and Restore
- RAID Protection

#### COMPREHENSIVE YET FLEXIBLE

- Multi-Platform Support
  - Windows
  - Mac OS
  - Linux
- Multi-Language Support
  - English
  - Simplified Chinese
  - Traditional Chinese
  - Japanese
  - Korean
- Multiple Backup Schedules
- Email Backup
- Option of Disaster Recovery (Sold Separately)
- Quota Management
- Up to 99 Versions

#### MULTI-LAYER SECURITY

- Compressed & Encrypted (AES, Twofish, Triple DES)
- Physical Security | Two Token Security System
- Secured End to End Data Protection
- User ID & Password | Authentication
- Users' Private & Confidential Vault
- Limited Access to REDiSAFE
- Resilient to Virus and Hacker Attacks

#### ADMINISTRATOR MANAGEMENT

- Near Zero Day-to-Day Administration
- Backup Quota Configuration
- Omission of Specific File Extension(s)
- Statistic reports on Users' Usage
- Automatic Pruning
- Better Storage Optimisation
